Software Engineering 5th Semester
Midterm Project Solutions Guide

Set A, Set B, Set C & Set D

Prepared from the four uploaded project briefs. This PDF is a compact implementation guide matching the required modules and acceptance tests.

Set A — University Student Portal

• Files: index.html, profile.html, courses.html, style.css, script.js, img/

• HTML: semantic dashboard, profile, course table with thead/tbody/tfoot and colspan, advisor form.

• CSS: Grid dashboard, Flexbox menu/cards, CSS variables, hover transitions, mobile sidebar behavior.

• JavaScript: grade-to-point object, add courses, total credits, GPA/CGPA, class remark, input checks.

• Notice board: createElement cards, delete/important actions through event delegation, category data, live counter.

• Storage: localStorage for notices and last CGPA.

• Acceptance test: add three courses, verify CGPA, add/mark/filter notices, resize to phone width.

Set B — Restaurant Ordering System

• Files: index.html, reservation.html, style.css, script.js, img/

• HTML: menu with categories, images/alt text, opening-hours table, reservation form with date, time and datalist.

• CSS: responsive card grid, price badges, sticky navigation, hero overlay and hover effects.

• JavaScript: menu array, add/remove/quantity controls, 5% VAT, 10% discount when subtotal exceeds BDT 1000.

• Reservation: preventDefault(), 01XXXXXXXX phone validation, 1–12 guests, no past dates, confirmation card.

• Storage: cart saved in localStorage.

• Acceptance test: order items until subtotal exceeds BDT 1000, refresh, then test an invalid phone number.

Set C — Online Bookstore

• Files: books.html, register.html, style.css, script.js, img/

• HTML: semantic book cards, dl for ISBN/publisher/year, search/filter form, registration fieldset/legend.

• CSS: product layout, variables, focus/invalid styles, New ribbon, animation-ready controls and responsive breakpoints.

• JavaScript: 10-book array, title/author includes search, category and price filters, sorting, no-results message.

• Wishlist/rating/modal: live wishlist counter, 5-star rating, quick-view popup, close button, outside click and Escape.

• Storage: wishlist and ratings saved in localStorage.

• Acceptance test: search Java, filter Fiction, sort by price, wishlist, rate, quick-view, close with Escape, refresh.

Set D — Travel and Tour Booking

• Files: index.html, booking.html, style.css, script.js, img/

• HTML: hero, package cards, comparison table with caption/rowspan/colspan, gallery and video fallback, booking form.

• CSS: full-height hero, Grid/Flexbox layout, sticky navigation and responsive mobile layout.

• JavaScript: package array, package select filled by JS, add-on pricing, if/else group discount, price breakdown.

• Discounts: 5% for 4+ travellers and 10% for 8+ travellers.

• Date object: trip end date is calculated from the selected package duration.

• Acceptance test: Sundarbans + 8 travellers + guide must show 10% discount and correct end date.

Common Submission Checklist

Item	Requirement
Folder	RollNo_SetA / RollNo_SetB / RollNo_SetC / RollNo_SetD
Files	Separate HTML pages, style.css, script.js and img/
Code	Vanilla JavaScript; no Bootstrap, jQuery or React
Storage	Use browser localStorage where required
Quality	Clear names, indentation and comments
Testing	Run each acceptance test before submission
Identity	Replace YOUR_ROLL with your actual roll number

Note: This PDF is a solution/implementation guide. The complete source-code ZIP was generated separately.
